Notes on stock:	Order INFO----Just a few important notes
"sm" = bareroot conservation grade sized typically 10-18" "potted sm" is a potted conservation sized seedling. Trees sold through the conservation district office are not guaranteed. Please contact us if you have any survival issues. We may be able to help troubleshoot. PLEASE CALL US IF YOU REQUIRE A SPECIAL ORDER WITH DIFFERENT SIZE	Orders involving quantities of trees over 200 per species should be paid in advance. Orders not picked up in a timely manner may be sold in June. You may start ordering trees in October to get yours reserved. Our trees will arrive in early May. Please note our trees do not come with a warranty. This allows us to keep prices low! Cancellations are highly discouraged and up to manager approval.

Fruit trees, fruiting shrubs, roots, vines

Species	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal \$
Apricot, Hardy (2-3ft) - may reach a height of 12-16 feet and spread on favorable sites. Flowers in May and produces small edible fruit which ripens in July and August. Self pollinating but more trees will result in heavier fruit set. Full sun and needs well drained soils	\$4.00		25	\$95.00		\$
Aronia berry* (chokeberry) sm - Reaches 5 to 8 feet, White flowers, produces edible fruit. Self Pollinator Tolerates low wet areas adaptable to varying soils. Full sun.	\$3.00		25	\$71.00		\$
Chokecherry*, Common (sm) - a large, suckering shrub or small tree native across the United States which may reach a height of 12-25 feet on favorable sites. Creamy-white flowers with a fleshy fruit with a stone in center suitable for jelly or wildlife. Moderate drought tolerant. Needs 2 plants for pollination. zone 4	\$3.50		25	\$83.00		\$
Chokecherry*, Common (2-3ft) - Same as description above	\$4.00		25	\$95.00		\$
Cherry, Nanking (2-3ft) - a medium sized, spreading shrub. Winter hardy, moderately fast-growing. On favorable sites it may reach a height of 6-10 feet. Prefers loamy soil. Produces attractive white to pink flowers and small, edible red cherries. Needs 2 plants for pollination, but will cross pollinate with plum and pin cherry.	\$4.00		25	\$95.00		\$
Crabapple, Midwest (sm) - A small to medium sized, roundheaded tree reaching a height of 15 to 25 feet. White flowers appear in May followed by the ¼" to ½" yellow or red fruits in October. Fruit does not drop from tree and remains all winter.	\$3.50		25	\$52.00		\$
Crabapple, Dolgo (sm) -Dolgo crabapple has very large dark purple fruit that is packed with flavor as crabs go. These apples make great jellies and some add the juice to ciders as a secret ingredient. Fruit is easy for wildlife to get to as this crab will drop it's fruit.	\$3.50		25	\$83.00		\$
Crabapple, Red Splendor (2-3ft sz) - A variable seed propagated strain of crabapple reaching 15 to 25 feet in height and width, variable fruit size, foliage green to red in color. Excellent wildlife plant.	\$4.50		25	\$105.00		\$
Crabapple, Siberian (white) (sm) - a small to medium sized, roundheaded tree reaching a height of 15 to 25 feet. White flowers appear in May followed by the 1/4" to 3/4" yellow or red fruits in October.	\$3.50		25	\$83.00		\$
Cranberry*, American Highbush - Reaches 6-10 feet, The creamy-white flowers, which appear in late May and early June, measure 3 to 4 inches across. The fruit, which ripens in September and October, resembles the true cranberry in size and color.	\$3.25		25	\$77.00		\$
Currant, Golden (sm) - an upright shrub with arching stems providing nesting cover for birds and wildlife reaching a height of 3-6 feet. Adaptive to variety of soil. Drought and saline tolerant. Native to the Midwest. Foliage turns orange in fall. Self pollinator. Used in Jellies.	\$3.50		25	\$83.00		\$
Currant, American Black - is a native shrub species three to six feet tall with erect branches lacking spines, on multiple stems. Ripe fruits are sweet and desirable for human consumption.	\$3.75		25	\$89.00		\$
Gooseberry - is a small spiny bush in the family Rosaceae which is grown for its edible fruit of the same name. Basic requirements Gooseberries grow best in cool, moist locations and can be damaged by intense summer heat.	\$3.00		25	\$71.00		\$
	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal \$
Elderberry, Common (black) * - a medium to large multi-stemmed, open, spreading shrub reaching 6 to 10 feet in height and spread, may lightly sucker to form open colonies. Large, white flower clusters are followed by purple-black fruits in late summer. Stems and leaves are poisonous. Fruit is edible and used medicinally.	\$3.50		25	\$83.00		\$
Juneberry (sm 10-24") -a small to medium, suckering shrub which may reach a height of 8-10 feet. Also known as serviceberry or Saskatoon. N.D. SEED SOURCE	\$8.00		25	\$190.00		\$
Mulberry Tree: (Morus alba var. tatarica) Medium tree. Introduced from Asia. Fairly fast growing. Fruit is white, pinkish, purple or black. Edible fruit attracts birds. Drought tolerant. May suffer winter dieback. North Dakota non-hardy, though we have seen it grow in sheltered areas in Grand Forks Co. (Size: 5/32", 12-20")	\$3.75		25	\$93.75		\$
Plum, American (sm) - a thicket-forming, thorny, medium to tall shrub reaching 8-12 feet in height on favorable sites. Produces yellow or red plums of variable size in late summer and fall. Needs 2 plants for pollination.	\$3.50		25	\$83.00		\$
Plum, Bounty (sm) - Bounty Plum will grow to be about 18 feet tall at maturity, One of the hardiest plums, with white flowers in early spring followed by tart red fruit in summer, good for jam; needs full sun and well-drained soil, a good pollinator for other plums.	\$3.25		25	\$75.00		\$
Plum, Prairie Red 2-3ft size -a thicket-forming, thorny, medium to tall shrub reaching 8-12 feet in height on favorable sites. White flowers appear in early May followed by edible yellow or red plums of variable size in late summer and fall.	\$4.50		25	\$105.00		\$
Pear, McDermand (sm) - a small to medium, roundheaded tree, reaching a height of 25 to 35 feet. White flowers appear in May followed by a small greenish-yellow fruit in fall. Use 2 trees as pollinators for heavier fruit set.	\$3.50		25	\$83.00		\$
Raspberry, Boyne - Red, medium acid with aromatic flavor. Vigorous, erect and sturdy. Excellent for canning, freezing, and dessert. Very productive and extremely hardy. Zone 3-8, full sun.	\$7.00		each			\$

Raspberry, Caroline Red- plant produces heavy crops of large raspberries with fantastic flavor. Very vigorous canes produce huge crops of large, firm raspberries and is more tolerant of root rot than some varieties.	\$7.00		each			\$
Vines						
Grapes, Riverbank- Zone 3	\$5.00		25	\$118.00		\$
Grapes, Valiant - Zone 3	\$14.25		each			\$
Short stature trees						
Ash, Mountain- a small, ornamental tree usually 15-20 ft., but reaching 30 ft. in favorable places. The crown is narrow, open and round-topped. Pinnately-compound, deciduous leaves occur on bright-red leaf stalks and turn golden-orange in the fall.	\$3.00		25	\$71.25		\$
Lilac, Japanese Tree (cream white)- Japanese lilacs are trees or very large shrubs that grow to a height of up to 30 feet with a spread of 15 to 20 feet . The plant has a naturally attractive shape and interesting, reddish bark with white markings that give it year-round interest.	\$3.50		25	\$83.00		\$
Maple, Amur (sm)- A large, multi-stemmed small. May reach 15-20 feet in height and spread. Noted for its attractive autumn color of yellow, orange, or red. Full sun.	\$3.75		25	\$89.00		\$
Maple, Amur (2-3ft) Same as above	\$5.00		25	\$118.00		\$
Olive, Russian (sm)- Russian olive is a shrub or small tree usually 12 to 45 feet tall. It can grow up to 6 feet per year. It forms a dense, rounded crown. Near the ground its branches spread from 10 to 20 feet. It reproduces from seed and by root sprouting. Grows in Saline soils.	\$3.50		25	\$83.00		\$
Tall Stature Trees						
Name	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal
Ash, Green(sm)- a medium to large straight trunked tree reaching 35 to 50 feet in height. Tolerant of wet or dry soil conditions, pH adaptable. Native to North Dakota	\$3.50		25	\$ 83.00		\$
Aspen, Quaking (sm)- Indifferent to soil condition, and can be found in moist, shallow, rocky, or clay soils. The bark is an attractive greenish white.	\$4.75		25	\$ 112.00		\$
Birch, Paper (2-3ft)- Very hardy birch .Does well in well drained soil with frequent moisture. Stems are a beautiful red-brown when immature, a perfect chalk-white when older.	\$6.00		n/a			\$
Birch, River (sm)- This river bottom native also does well on upland soils. Some resistant to bronze birch borer, it has a nice yellow fall color, and attractive cinnamon brown exfoliating bark for an interesting winter effect.	\$3.50		25	\$83.00		\$
Boxelder (sm)- it's an easy-to-grow, very adaptable maple. The wood of boxelder maple trees is soft and can be tapped for maple syrup.	\$3.50		25	\$83.00		\$
Boxelder (2-3 ft) Same description as above	\$5.00		25	\$118.00		\$
Buckeye, Ohio (6-12")- a medium sized spreading tree reaching 25 to 40 feet in height and spread on favorable sites. Leaves are palmately compound, fruit is an inedible nut produced. Squirrels love them. Prefers a moist, well-drained soil. Suitable for farmstead plantings with protection in non-saline soils.	\$3.00		25	\$71.00		\$
Catalpa, Northern (sm)- Fast growing tree has few branches at an early age. Once branched, ascending limbs are gnarled and twisted. In June 2" long, flowers appear in 4-8 in" panicles. Fruit is a long persistent pod. Tolerates salinity. Flourished in this summers drought.	\$3.00		25	\$71.00		\$
Coffeetree, Kentucky (sm)- has a deeply furrowed bark and stout branches that are particularly handsome in winter. It prefers deep, moist soil and full sun, but is adaptable to many conditions such as alkaline soil, salt, and drought. The mahogany seed pods are long and leathery.	\$3.00		25	\$71.00		\$
Cottonwood, Native (sm)- Populus a large spreading tree reaching 60 to 90 feet in height and 40 to 60 feet in spread. This native specie occurs along waterways and wet meadows throughout the Plains states. Greater drought and alkalinity tolerance than .Produces seed in tufts of "cotton". Long lived has growth of 6 ft per year.	\$3.50		25	\$83.00		\$
Cottonwood, Silver (cg) (White Poplar)- a species of poplar, most closely related to the aspens. It grows in moist sites, often by water.The bark is smooth and greenish-white to greyish-white with characteristic diamond-shaped dark marks on young trees, becoming blackish and fissured at the base of old trees. Does sucker.	\$3.75		25	\$89.00		\$
Cottonwood, Siouland (sm)- A large, vigorous, cottonless male tree to 70 feet in height on favorable sites, spreading crown in open areas but with a tall, central trunk when crowded. Selected for leaf rust resistance.	\$3.50		25	\$83.00		\$
Elm, American (Princeton, 6 "+) - Proven highly resistant to dutch Elm disease. Fast growing, graceful, symmetrical branching. Adaptable to extremes in pH, moisture, heat and wind.	\$8.00		n/a			\$
Elm, Siberian (sm)- a medium to tall, rapid growing tree with an open crown which may reach over 50 feet in height.	\$3.50		25	\$83.00		\$
Hackberry, Northern (sm)- A medium to large tree with a spreading crown reaching a height of 35-55 feet. Fruit is a small dark berry utilized by wildlife.	\$3.50		25	\$83.00		\$
Honeylocust, Thornless- A medium to large spreading tree reaching 45 to 75 feet in height on good sites, adaptable to variable soil conditions. produces a long brown pod. We produce hardy seedlings of the variety inermis, which are mostly thornless. Climatic zones 4 and warmer.	\$3.75		25	\$89.25		\$
Linden, American (sm)- A medium to large pyramidal tree, becoming oval to spreading when mature. May reach 50 to 75 feet in height and 30 to 45 feet in spread on suitable sites. Fragrant flowers in June are cream yellow in color and in clusters of 5 of 8.Prefers a deep, moist, well drained soil, not drought tolerant.	\$4.25		25	\$101.00		\$
Linden, Littleleaf (sm)- a medium sized tree reaching 35 to 45 feet in height, spread of 20 to 30 feet. Leaves smaller than American linden, and more densely branched. Suitable for farmstead and conservation plantings where moisture is adequate. Not drought tolerant.	\$3.25		25	\$77.25		\$
Maple, Sugar 2-3ft size	\$5.50		25	\$130.75		\$
Maple, Red (sm)- A medium to large maple native to the upper Midwest, northeast United States and lower southeast Canada. Reaches 45 in height on favorable sites. Prefers bottomland type sites with adequate moisture and neutral to acid soil pH. Not tolerant of soil alkalinity or drought.	\$3.75		25	\$89.25		\$
	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal
Species						
Maple, Silver (sm)- (zone 4) – A medium to tall, spreading tree reaching 40 to 60 feet in height and spread on favorable sites. Prefers a moist, well-drained soil. Drought and high soil pH intolerant. Riparian planting species.	\$2.75		25	\$65.50		\$
Maple, Northern Sugar (sm)- Slow to medium in growth rate and very hardy, it prefers rich, well-drained soil. Fall colors range from yellows to all shades of oranges and red.	\$2.50		25	\$59.50		\$

Oak, Bur 2-3 ft(sm)- a medium to large, adaptable, long-lived tree with a wide, spreading crown which may reach a height of 40-60 feet on favorable sites. Produces acorns which are utilized by a wide variety of wildlife. It is native across the eastern and midwestern United States.	\$4.50		25	\$107.50		\$
Oak, Red (sm)- a medium to large, long lived red oak with a spreading crown, may reach 50 to 75 feet in height on favorable sites which provide a deep, well drained, neutral to acid soil. Not adapted to the dry, alkaline soils. Zone 4	\$3.75		25	\$89.25		\$
Poplar, Lombardy (sm) Lombardy poplars are fast-growing trees, growing as much as 6 feet per year. This makes them a popular choice when people want "living wall" privacy screens. To serve this function, Lombardy poplars are planted in a row, and spaced about 8' apart.	\$4.50		25	\$101.00		\$
Poplar, Prairie Sky 2-3ft- is an upright, vigorous male selected for form, disease resistance, and winter hardiness. Height to 50ft and a spread of only 6 to 8 feet at maturity. Good form for screen plantings and single row belts on high value land.	\$4.25		25	\$101.00		\$
Walnut, Black (sm)- a medium to large, spreading, roundheaded tree which may reach 50feet in height on favorable sites. Prefers a moist, well-drained soil. The fruit is a hard shelled nut. Slow growing.	\$3.75		25	\$89.25		\$
Willow, Diamond (sm) Year's ago an old man asked us if we could order these because they are used for making walking sticks. We are bringing them back this year!	\$3.75		25	\$89.25		\$
Willow, Flame Bright orange foliage looks beautiful on this large shrub. Sells out fast. Hurry!	\$5.00		25	\$125.00		\$
Willow, Hybrid (Matsudana/Alba)- A small to medium-sized, upright spreading tree of about 30 feet in height with a 15-foot-spread. Branches arise from the trunk at an acute angle and grow up almost parallel to the trunk before they curve back to the horizontal.	\$3.50		25	\$83.25		\$
Willow, Golden (sm)- A large low-branching tree forming a broad round-topped crown with slender, drooping branches. Brought over from Europe and central Asia. Widely planted as a yard tree. Its branches shed easily throughout the season.	\$3.75		25	\$89.00		\$
Willow, Laurel-leaf (sm)- a small to medium sized tree reaching 25 to 35 feet in height and spread on favorable sites. Leaves are glossy and dark green in color. Attractive as a specimen tree. Native from Europe to central Asia.	\$3.75		25	\$89.00		\$
Willow, Laurel-leaf (3-5ft) Same description as above	\$8.00		10	\$76.00		\$
Willow, Peachleaf (sm)- It is a small to medium-sized deciduous tree, growing 13-66 ft tall; besides the cottonwoods, it is the largest tree native to the prairies. It has a single trunk, or sometimes several shorter trunks.	\$3.50		25	\$83.25		\$
Willow, White (sm)- a large, vigorous, moisture loving tree with a spreading crown which may reach heights in excess of 40 feet on favorable sites.	\$3.50		25	\$83.25		\$
Shrubs	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal
Almond, Russian (sm)- A low, suckering shrub native to western Asia and eastern Siberia. Hardy, suckering habit makes it difficult to control. However, the dense thickets formed are excellent for wildlife food and cover. Abundant pink to rosy flowers in early spring.	\$3.50		25	\$83.25		\$
Buffaloberry, Silver (sm)- a thorny, thicket forming, medium to tall shrub which may reach 12-15 feet in height. Abundant small, red, astringent fruits. Tolerant of dry and alkaline or saline soils.	\$3.50		25	\$83.25		\$
Caragana (sm)- a very hardy, medium to tall, upright shrub which can reach 12 to 14 feet in height on favorable sites and withstand drought. Adaptive to wide range of soils types and high pH. Best shrub row for blocking wind.	\$2.75		25	\$65.50		\$
Cotoneaster, Centennial- Centennial cotoneaster grows to a mature height of 8 to 12 feet. Crown width is 12 to 15 feet.	\$2.75		25	\$65.50		\$
Dogwood, Redosier (sm)- a medium sized, multi-stemmed, lightly suckering shrub which may reach a height of 7-10 feet. Likes moist, somewhat wet loam soil but adaptable to variety of soil. Grows in sun or shady understory.	\$3.50		25	\$83.25		\$
Dogwood, Redosier (2-3)- Same description as above	\$5.00		25	\$95.00		\$
Hazelnut, American (sm)- An upright to rounded, multi-stemmed, strongly suckering shrub reaching 6 to 12 feet in height and spreading by suckering to at least as wide. Fruit is a small edible nut which wildlife enjoys. Adaptable to varying soil types, prefers a moist well drained soil with full sun but will tolerate some shade.	\$3.50		25	\$83.25		\$
Honeysuckle, Freedom- is a vigorous shrub that was introduced by the University of Minnesota. Its primary use is in windbreak and shelterbelt plantings and as a background screen in large areas. Plant in full sun 6ft apart.	\$3.50		25	\$83.25		\$
Indigo, False (sm)- a native, multi-stemmed shrub occurring along waterways throughout the Midwest. False Indigo, a legume, has pinnately compound leaves and dark purple flowers followed by very small pods as fruit. Height and spread on favorable sites is 4 to 7 feet. Tolerates poor to well-drained sites and seasonally standing water.	\$3.50		25	\$83.25		\$
Lilac, Common purple (sm)- an upright, suckering, medium to tall shrub which grows 8-12 feet in height. Flower color is purple or white.	\$3.75		25	\$89.25		\$
Lilac, Villosa (sm) pink- a medium to large, dense, non-suckering, upright shrub. Flowers are pink and villosa lilac blooms about 2 weeks later than common lilac. Reaches a height of 12 feet on. Requires full sunlight.	\$3.75		25	\$89.25		\$
Nannyberry (sm)- A 12ft native tree-like shrub, occasionally found in North Dakota wooded areas. Attractive for its shiny foliage, red fall color and fruit display. Adaptive to a variety of soils. Flowers are creamy-white, non fragrant. Self pollinating.	\$3.25		25	\$89.25		\$
Rose, Hansen Hedge (sm)- A medium to tall shrub rose that is adapted to the Northern Plains. The fruit is referred to as a rose hip and is a source of Vitamin C. Showy, pink flowers like to spread and sucker.	\$3.50		25	\$83.25		\$
Seaberry- It is prized for both its ornamental value and its edible berries. This hardy, carefree deciduous shrub makes excellent hedges and wildlife habitats, and its bright yellow-orange to red berries are particularly high in vitamin C. Although the fruit, with its tart astringency, may not be ideal for snacking, it is delicious in juices and jams.	\$3.50		each	cannot guarantee if male or female		\$
Sumac, Smooth- suckering, open shrub reaching 5 to 10 feet in height. The pinnately compound leaves turn an excellent orange to red color in the fall. Best used in wildlife and slope stabilization plantings due to its suckering habit and umbrella canopy. Moderately drought tolerant, adapts to a variety of soil types.	\$3.50		25	\$83.25		\$
Sumac, Staghorn- a medium to large, suckering, open shrub reaching 10 to 20 feet in height and forming colonies. The pinnately compound leaves turn orange to red-orange in the fall.	\$3.50		25	\$83.25		\$
Willow, Sandbar (sm)- a medium sized suckering shrub reaching a height of 5 to 10 feet. This specie forms dense thickets for wildlife habitat with its wide spreading root system. Also useful as an aggressive colonizer in riparian plantings to stabilize streambanks.	\$3.50		25	\$83.25		\$

Conifers	Individual Price	Individual QTY	Bundle	Bundle Price	Bundle QTY	Subtotal
Cedar, Eastern Red (sm) - A densely pyramidal plant when young becoming slightly pendulous as it ages. Prefers sun and performs well in any well-drained soil. Will also tolerate poor, gravelly soils and various pH levels. Drought tolerant, moderate flooding, turns brown in winter.	\$2.75		50	\$130.75		\$
Fir, Douglas (sm) 12-15" - Douglas fir trees have long, flat, spirally arranged needles that grow directly from the branch and completely surround it.	\$3.50		50	\$166.25		\$
Juniper, Rocky Mountain (sm) - Tree reaches 20-30 feet in height and has a slow growth rate. It's growth habit has a dense pyramidal, upward reaching branches. Is cold hardy and drought resistant.	\$2.75		50	\$130.75		\$
Pine, Ponderosa (sm) - A long-needled pine with dark green foliage and large cones. Flexible, Three-needled pine. Best used in mass plantings in a park-like setting.	\$3.00		25	\$71.25		\$
Pine, Mugo This full sized version is hardy to zone 2, slow growing, and a beauty!	\$5.50		each			
Pine, Scotch (sm) - A medium to large tree, typically pyramidal when young, becoming more rounded and open with age. The largest tree in North Dakota is 46 feet tall with a canopy spread of 34½ feet. Long needles	\$3.00		25	\$71.25		\$
Spruce, Black Hills(sm) - Shapely "Christmas Tree" type evergreen, with short, blue-green needles. Shears easily. Useful as a specimen, hedge, or windbreak. Best in full sun, but tolerates light shade.	\$3.00		25	\$71.25		\$
Spruce, Black Hills (2ft bare root) Same descripton as above	\$6.00		each			\$
Spruce, Colorado Blue (2 ft bare rt) -A hardy, drought resistant conifer with a symmetrical broad-pyramid form. Useful as a specimen or windbreak.	\$6.00		each			\$
Spruce, White ,15-18" , grows faster than other spruce- A straight, tall tree easily recognized by its needles. Cones always hang down. Beautiful year-round color. Tolerates most soil conditions. Grows to 60'; 15' spread.	\$3.50		each			\$
